Work Experience

- **Zombie Shooter** is a webGL based top down shooter game made in 2 days.
- **NotQuietHexagon** is a webGL based Super Hexagon replica developed for my school assignment under 10 minutes.
- **Bad Game?** is a Dodge The Blocks type of game made for a 1hr game challenge.
- **PongExtreme** is a webGL based pong game extreme developed for my school assignment under 1 hour.
- **The Killer Cylinder** is a casual, FPS game about killing cubes with a cylinder, and to reach and collide with the big brain. This game was made for the Bada Soch game jam, hosted by Nikhil Malankar.
- **Meteorite Mayday: Planet Panic** is a game where you control the satellites and try to save the planet from getting hit by the meteorites.
- **Spike Hopper** is a casual android game similar to Flappy Bird but with a twist.

Personal Projects

- **Flix-cli** is a high efficient, powerful and fast movie scraper.
- **Artgare-Cli** is a command line application written in POSIX compliant shell script which lets you download 3D models right from your terminal.
